## Choose Goals What do we want to achieve?

RANK GOALS

Most Important  
↑

Drag your top 5 goals above this line.

- Efficient Infrastructure
- Clean Air & Water
- Housing Choices
- Transportation Choices
- Local Food Production
- Create Great Places
- Regional Prosperity
- Healthy People

### Efficient Infrastructure

Building infrastructure extensions to serve low density sprawl and leapfrog development is not as efficient as developing near existing roads, sewers, and utilities.

To make the best use of our current investment and to keep operating and maintenance costs low, we must fully use our existing infrastructure.

This goal is not above the line.

Use our prime soils, plentiful water, and farm-to-market road network to grow our food production capabilities into a complete local food economy.

To grow our local food systems in the region, we need to:

### Preserve significant agricultural lands

Protect prime agricultural lands for local food production.

   
 ★ Favorite

### Increase demand for locally grown food

Get commitment from large local food users such as schools, universities and grocery stores to buy what is grown locally.

   
 ★ Favorite

### Invest in local food infrastructure

Invest in the systems that process, distribute and sell local food products.
